MCPU2 CPU COOLER

MCPU2 is a heat dissipator for CPU that due to its 4 pcs, U-shape and superconductive, offers outstanding cooling as they are in direct contact with the processor.

Its dual fin towers design, with an exclusive nano-ceramic coating, increases up to 30% contact with air, so it achieves the best heat-dissipating performance.

MCPU2 has a 92mm fan, including 4 pin PWM technology, for a total control of fan's speed at any time. Both automatically or in a manual way, we can control speed and air flow generated by MCPU2, adjusting it to our computer's needs.

MCPU2 is a universal heat dissipator that supports INTEL LGA775/ 1150/ 1156/ 2011, AMD FM1/ AM2/ AM2+/ AM3/ AM3+/FM2/FM2+ and socket 2011 processors.
